Make business run smoother with Microsoft 365 Business

Discover the best-in-class triple package with Microsoft 365 Business. Bringing together Office 365 Business Premium, Windows 10 Pro Security and the best of Enterprise + Mobility, Microsoft 365 helps you to build a successful business by giving you the productivity tools you need, anytime and anywhere.

Not only does Microsoft 365 Business protect your business from every day threats by using in-built advanced security methods via the Windows 10 Pro operating system, it also supports your journey to GDPR compliance with EM+S features such as mobile device data protection and encryption.

‘ In 2016, around two out of every three British enterprises suffered breaches, with an average loss of around \$4.1m – despite doubling their information security budgets to £6.2 million. ’

- SailPoint’s 2017 Marketing Pulse Survey
& PWC ‘UK organisations double Cybersecurity spend
but breaches continue’

Protecting Company Data is equally important to both SMBs and Enterprises

SMBs and Enterprises are approaching their technology investments in similar ways. When it comes to protecting company data and bolstering cyber security, SMBs are often using Enterprise solutions to prevent data leakage and identity theft. So, while their customers are different, the software they use to prevent security breaches aren't.

Research carried out by Forrester suggests that SMBs are more likely to have an informal IT risk management policy or manage issues on the go, whilst Enterprise businesses are more likely to know or follow their company's policy for data use and handling. With Microsoft 365, you can fill in those security holes and ensure your employees' productivity levels remain at an all-time high.

Supporting your GDPR Compliance Journey

With GDPR set for May 2018, your data compliance journey starts at the front door with the software you choose. Microsoft 365 is a complete solution designed to comply with the General Data Protection Regulation. Features such as Windows Information Protection in Windows 10 Pro helps businesses prevent accidental leaks by restricting user and app access to files based on previously defined policies. You'll also have access to mobile app management capabilities with Intune that are customised specifically for small to medium-sized businesses.

Free upgrade to Windows 10 Pro

While Microsoft 365 Business does not contain Windows 10 Pro as an Operating System, it does include a free upgrade for certain users. If you already have and are using Windows 7 Pro, Windows 8 Pro or Windows 8.1 Pro across your business, you'll automatically receive a free upgrade to Windows 10 Pro.

Upgrading means you'll get the most out of the advanced and up-to-date security features in Windows 10 Pro, without having the inordinate hassle of moving everything over at a later stage. On the other hand, if your business PCs already have the Windows 10 Pro OS installed, Microsoft 365 Business will install automatically through Windows AutoPilot mode, freeing up your time so you can focus on your business.

Features

Product Features	Office 365 Business Premium	Microsoft 365 Business

Why choose Microsoft 365 Business?

Easy setup and deployment

Microsoft 365 Business can be setup and deployed quickly by your IT team, leaving your business with less down-time.

Supports your data compliance journey

Helps to protect your business data, guard against accidental sharing of sensitive information and improves compliance.

Simplified for business

Easily sign in to all services from any device with a simple sign on process and let your IT team manage all users quickly and efficiently.

Why choose Microsoft 365 Business?

Front door security

Manage identity and access controls by only allowing certain users access to sensitive company data and quickly stop breaches before they escalate in severity.

Mobile working

Like Office 365, your users can easily work securely with access to data from anywhere and in any location.

Achieve more together

Collaborate and communicate on projects together with anytime access to Microsoft Teams, Word, Excel, PowerPoint and more.

Boost your company's productivity, security,
mobility with Microsoft 365 Business and contact
us today.
