

Transform your school with the power of the cloud

Microsoft 365 Education

Office 365

Windows 10

Enterprise Mobility + Security

STAR
ITEURO[®]

Why move to the cloud? With Microsoft 365 Education you can:

Deliver new capabilities for students and educators

Ensure that your students and educators always have access to the latest feature innovations, with automatic updates for Office 365 and Windows 10, and new technologies such as Minecraft: Education Edition with Code Builder and 3D and Windows Mixed Reality.

Move to the cloud with confidence

The cloud provides an agile technology foundation, built to meet your institution's needs and reducing the cost and complexity of IT. Microsoft's FastTrack* program – a set of best practices, tools, resources, and experts included with your subscription – gives you the support you need to make your cloud experience a success.

Protect your institution and student information from security threats

Tap into the power of the cloud to get advanced security and control features that protect your campus against malware and untrusted apps. Simplify IT management and get peace of mind with the latest security patches and updates automatically delivered through the cloud to keep all your devices and applications current and protected.

Simplify and increase the value of your licensing

No more counting devices and no need to add licenses when moving between on-premises and cloud—simply license each user to address on-premises and cloud needs. You can also give all your students access to the enriched learning experiences available through Microsoft 365 Education with our Student Use Benefit, which offers software to students at no additional cost when you license 100% of staff and faculty.
